Trust in banks crashes

2020

COVID-19 Pandemic
Business tied, then surpassed NGOs as most trusted institution

A Generation of Institutional Failures Erupts Into Grievance

2025 Edelman Trust Barometer

Methodology

Annual online survey in its 25th year

Fieldwork conducted: Oct 25 – Nov 16, 2024

Argentina	Colombia	Ireland	Mexico	S. Africa	UAE
Australia	France	Italy	Netherlands	S. Korea	UK
Brazil	Germany	Japan	Nigeria	Spain	U.S.
Canada**	India	Kenya	Saudi Arabia	Sweden	
China	Indonesia	Malaysia	Singapore	Thailand	

Data collected is representative of the general population across age, gender, region and ethnicity/nationality (where applicable) within each country.

*The sample size varies by country, from 1,150 to 2,124.
28-market global data margin of error: General population +/- 0.7 percentage points (n=33,194). Country-specific data margin of error: General population +/- 2.8 to 3.8 percentage points (varies by country based on sample size, n=1,150 to n=2,124). Margin of error is calculated at the 99% confidence level.
**Respondents in Canada who took the survey in French were recontacted between December 12 and 17, 2024 to address a translation issue affecting some questions.

Global averages

Unless otherwise indicated, global averages are composed of all 28 countries surveyed.

Statistical significance

Indicates a statistically meaningful difference or change in the data that is unlikely to be due to chance or a random fluctuation.

All indicated year-over-year significant changes were determined using a t-test set at a 99%+ confidence level.

Shortened question text

Throughout the report, question text has been edited for readability.

For more details on the margin of error, global averages, country-specific sample information, or to see the full text for any shortened statements, please see the Technical Appendix.

All content in this report are the property of the Edelman Trust Institute.

Institutional Failures Push Us to the Brink

Trust Index 2024 to 2025: Elections Fail to Improve Trust

Trust Index

(average percent trust in business, government, media, NGOs)

☒ Countries with national elections or changes in government leadership in the past year^

☒ Only 2 of these 13 countries see a significant trust change from 2024 to 2025
*Argentina +9**
*S. Africa +4**

2025 Edelman Trust Barometer. The Trust Index is the average percent trust in business, government, media, and NGOs. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level. ^For more information about countries, dates, and events included, please see the Technical Appendix.

Globalization, Economic, and Technology Fears Worsen Job Insecurity

Percent of employees who worry

My **job security** is threatened by...

2025 Edelman Trust Barometer. POP_EMO. Some people say they worry about many things while others say they have few concerns. We are interested in what you worry about. Specifically, how much do you worry about each of the following? 9-point scale; top 4 box, worry. Attributes only asked of those who are an employee of an organization (Q43/1). General population, 28-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Unprecedented Global Decline for Employer Trust

Percent of employees who trust

GLOBAL 22

I trust my employer to do what is right

2025 Edelman Trust Barometer. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 22-mkt avg. Attribute only shown to those who are an employee of an organization (Q43/1). Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Respondents in Canada who took the survey in French were recontacted between December 12 and 17, 2024 to address a translation issue affecting this question. For more details, please see the Technical Appendix.

Low Income Mired in Distrust

Percent trust

GLOBAL 21

Trust Index
(avg of business, government, media, NGOs)

2025 Edelman Trust Barometer. The Trust Index is the average percent trust in business, government, media, and NGOs. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 21-mkt avg., by income. Income quartiles were determined separately for each country based on the distribution of household incomes among respondents from that country.

Due to a translation inconsistency in France, the 2021-2023 Trust Index scores have been imputed using a model. For more details, please see the Technical Appendix.

Fear That Leaders Lie to Us at All-Time High

Percent who worry

Government leaders

Business leaders

Journalists and reporters

purposely mislead people
by saying things they know are false or gross exaggerations

2025 Edelman Trust Barometer. POP_EMO. Some people say they worry about many things while others say they have few concerns. We are interested in what you worry about. Specifically, how much do you worry about each of the following? 9-point scale; top 4 box, worry. Attributes asked of half the sample. General population, 26-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level. The all-time highs and lows analysis comprised countries with at least five waves of data collection.

Majority Convinced the Wealthy Take More Than Their Fair Share

Percent who agree

GLOBAL 28

The wealthy
don't pay their fair share of taxes

67%

The wealthy's selfishness
causes many of our problems

65%

4 in 10 See Hostile Activism as a Viable Means to Drive Change

Percent who say

GLOBAL 28

I approve of hostile activism to drive change:

- Attack people online (27%)
- Intentionally spread disinformation (25%)
- Threaten or commit violence (23%)
- Damage public or private property (23%)

40% (net)

Over 1 in 2 young adults approve of hostile activism

2025 Edelman Trust Barometer. CNG_MECH. Which actions would you approve of as ways to bring about societal changes you felt would give you and your family a better future? For each of the potential ways to bring about change listed below, pick the statement which best describes how you would feel if someone did this. 4-point scale, codes 3-4, approve. Question asked of half the sample. General population, 28-mkt avg., and by age. The “Hostile Activism” data is a net percentage of attributes 7-10, meaning the percentage of respondents who approved of one or more of the four items shown.

A Crisis of Grievance

Our Future in Peril: We Lack Optimism For The Next Generation

Percent who say

GLOBAL 28 ■ Developed countries

Compared to today,
the next generation will be better off

ONLY
36%

2025 Edelman Trust Barometer. BET_FUT. How do you think the state of things in your country will be for the next generation compared to how things are in your country today? 5-point scale; top 2 box, better. Question asked of half the sample. General population, 28-mkt avg.

Fear of Being Discriminated Against Surges to All-Time High

Percent who say

2025 Edelman Trust Barometer. POP_EMO. Some people say they worry about many things while others say they have few concerns. We are interested in what you worry about. Specifically, how much do you worry about each of the following? 9-point scale; top 4 box, worry. Attribute asked of half the sample. General population, 26-mkt avg. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level. The all-time highs and lows analysis comprised countries with at least five waves of data collection, therefore Nigeria and Sweden were not included.

Fear of Being Discriminated Against Surges Across Demographics

Percent who say

GLOBAL 26

Significant change

All-time highs and lows

I worry about experiencing prejudice, discrimination, or racism

Gender | Age | Income

U.S. Race and Ethnicity

2025 Edelman Trust Barometer. POP_EMO. Some people say they worry about many things while others say they have few concerns. We are interested in what you worry about. Specifically, how much do you worry about each of the following? 9-point scale; top 4 box, worry. Attribute asked of half the sample. General population, 26-mkt avg., and by gender, age, income and U.S. Non-Hispanic White, Black, Hispanic, and ANHPI communities. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

6 in 10 Hold Grievances Against Business, Government, and the Rich

Percent who hold a low, moderate, or high sense of grievance

GLOBAL 26 excl. China, Thailand

I hold a sense of grievance because:

- *Business and government serve select few*
- *Business and government actions hurt me*
- *The system favors the rich*
- *The rich are getting richer*

My sense of grievance is moderate or higher

61%

Majorities Hold Grievances in Nearly All Countries Measured

Percent who say, by sense of grievance

GLOBAL 26 excl. China, Thailand

My sense of grievance against business, government, and the rich is moderate or higher

Majority hold moderate or higher grievance in 23 of 26 countries

Your Gain is My Loss: Grievance Instills a Zero-Sum Mindset

Percent who say, by sense of grievance

GLOBAL 26 excl. China, Thailand

I have a **zero-sum mindset**:

What helps people who don't share my politics comes at a cost to me

2025 Edelman Trust Barometer. POL_AFF. Please specify where your feelings about people in your own country who have different political beliefs than you fall on the scale between two opposing directions. 11-point scale; bottom 5 box, negative. Question asked of half the sample. General population, 26-mkt avg., by Sense of Grievance scale. Certain data included in the scale was not collected in China or Thailand. For a full explanation of how the Sense of Grievance scale was developed, please see the Technical Appendix.

Grievance Imposes a Trust Penalty

Percent trust, by sense of grievance

2025 Edelman Trust Barometer. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 26-mkt avg., by Sense of Grievance scale. Certain data included in the scale was not collected in China or Thailand. For a full explanation of how the Sense of Grievance scale was developed, please see the Technical Appendix. "Bus" represents Business, "Gov" represents Government, "NGO" represents NGOs, and "Med" represents Media.

With Greater Grievance, More Suspicious of Artificial Intelligence

Percent who say, by sense of grievance

GLOBAL 26 excl. China, Thailand

I trust artificial intelligence

I am comfortable with the use of AI by business

2025 Edelman Trust Barometer. TEC_TRU_AI. How much do you trust the below technology? 9-point scale; top 4 box, trust. Question asked of half the sample. AI_INT_KPI. For each of the following institutions, please indicate whether their general use of artificial intelligence such as machine learning, natural language processing, and generative AI is something you are comfortable with or something you are concerned about. 5-point scale; top 2 box, comfortable. Question asked of half the sample. General population, 26-mkt avg., by Sense of Grievance scale. Certain data included in the scale was not collected in China or Thailand. For a full explanation of how the Sense of Grievance scale was developed, please see the Technical Appendix.

With Greater Grievance, Trust in Business Leaders Erodes

Percent who say, by sense of grievance

GLOBAL 26 excl. China, Thailand

I trust CEOs in general

I trust my CEO
(among employees)

2025 Edelman Trust Barometer. TRU_PEP. Below is a list of groups of people. For each one, please indicate how much you trust that group of people to do what is right. 9-point scale; top 4 box, trust. "CEOs" only asked of half the sample; "My CEO" only asked to those who are an employee of an organization (Q43/1). General population, 26-mkt avg., by Sense of Grievance scale. Certain data included in the scale was not collected in China or Thailand. For a full explanation of how the Sense of Grievance scale was developed, please see the Technical Appendix.

Respondents in Canada who took the survey in French were recontacted between December 12 and 17, 2024 to address a translation issue affecting "My CEO." For more details, please see the Technical Appendix.

Business Amid the Crisis of Grievance

Only Business Seen as Both Competent and Ethical

(Competence score, net ethical score)

GLOBAL 20 excl. China, France, Saudi Arabia, S. Korea, Thailand, UAE

2025 Edelman Trust Barometer. The ethical scores are averages of nets based on [INS]_PER_DIM/1-4. Media and NGOs were only asked of half the sample. The competence score is a net based on TRU_3D_[INS]/1. Media and NGOs were only asked of half the sample. General population, 20-mkt avg. Data not collected in China and Thailand; Due to a translation inconsistency in France, Saudi Arabia, S. Korea and UAE, they have been excluded from this analysis. For full details regarding how this data was calculated and plotted, please see the Technical Appendix. Respondents in Canada who took the survey in French were recontacted between December 12 and 17, 2024 to address a translation issue affecting this question. For more details, please see the Technical Appendix.

Grievance Undermines Belief in Business Competence and Ethics

(Competence score, net ethical score),
by sense of grievance

GLOBAL 24 excl. China, Saudi Arabia, Thailand, UAE

2025 Edelman Trust Barometer. The ethical scores are averages of nets based on [INS]_PER_DIM/1-4. Media and NGOs were only asked of half the sample. The competence score is a net based on TRU_3D_[INS]/1. Media and NGOs were only asked of half the sample. General population, 24-mkt avg., by Sense of Grievance scale. Data not collected in China and Thailand; Due to a translation inconsistency in Saudi Arabia and UAE, they have been excluded from this analysis. For full details regarding how this data was calculated and plotted, please see the Technical Appendix.

Note: The net ethical scores for Business and Government comprise an attribute ("[Institution] serves select few") that is part of the grievance mindset definition. For more details, please see the Technical Appendix.

Respondents in Canada who took the survey in French were recontacted between December 12 and 17, 2024 to address a translation issue affecting this question. For more details, please see the Technical Appendix.

Business: Empower Us with Well-Paid Jobs and Skills for the Future

News organizations would rather...

2025 Edelman Trust Barometer. ATT_MED_AGR. Below is a list of statements. For each one, please rate how much you agree or disagree with that statement using a nine-point scale. 9-point scale; top 4 box, agree. Question asked of half the sample. General population, 26-mkt avg., by Sense of Grievance scale. Certain data included in the scale was not collected in China or Thailand. For a full explanation of how the Sense of Grievance scale was developed, please see the Technical Appendix.

Influence is Earned Through Compassion, Not Power

Percent who say, by sense of grievance

GLOBAL 26 excl. China, Thailand

You will earn legitimate influence with me if you...

2025 Edelman Trust Barometer. LEG_INF. There are many people who share information, recommendations, and their opinions in an attempt to influence the views and behavior of people like you or people in positions of power and authority. Some of these people you might consider to be legitimate sources of influence and expertise, while others you might not. How important is each of the following in making you see someone as a legitimate influence or expert, such that you willingly give them influence on your life decisions and you would be comfortable with them influencing the views and behaviors of people in positions of power and authority? 9-point scale; top 4 box, important. Question asked of half the sample. General population, 26-mkt avg., by Sense of Grievance scale. Certain data included in the scale was not collected in China or Thailand. For a full explanation of how the Sense of Grievance scale was developed, please see the Technical Appendix.

When Trust Increases, Economic Optimism Overpowers Grievance

Among those with different levels of trust,
percent with a high sense of grievance and percent with personal economic optimism

GLOBAL 26 excl. China, Thailand

I have high grievance I have economic optimism

2025 Edelman Trust Barometer. Sense of Grievance scale. CNG_FUT. Thinking about the economic prospects for yourself and your family, how do you think you and your family will be doing in five years' time? 5-point scale; codes 1-2, better off. General population, 26-mkt avg., by average level of trust across the four institutions of business, government, media and NGOs. Certain data included in the Sense of Grievance scale was not collected in China or Thailand. For a full explanation of how the Sense of Grievance scale was developed, please see the Technical Appendix.

Restoring Trust and Building Optimism Amid the Crisis of Grievance

1

Grievances must be addressed

The institutional failures of the last 25 years have produced grievances around the world, stifling growth and innovation in turn. To lead through this crisis, understand the economic realities of your stakeholders, champion shared interests, and create opportunities for optimism.

2

Business has a license to act

Those with a higher sense of grievance are more likely to believe that business is not doing enough to address societal issues. To navigate these expectations, understand where you have obligations, act on behalf of your stakeholders, and advocate for your organization.

3

Business can't act alone

Business, government, media, and NGOs must work together to address the root causes of grievance and enable trust, growth, and prosperity. Invest in local communities, quality information, and job skills. Deliver results that benefit everyone fairly.

4

With trust, optimism overpowers grievance

When institutions can't be trusted to do what is right, grievances fester and outlooks darken. To dissipate grievance and increase optimism, prioritize and rebuild trust across your organization and local communities.

Supplemental Data

Business Remains Most Trusted Institution

Percent trust

GLOBAL 28

2025 Edelman Trust Barometer. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. U.S.	1,150	1,150			

1. Data reported on slides is weighted to the same total base size to ensure each country has an equal effect on the global average. Some questions were asked of only half of the sample. Please refer to the footnotes on each slide for details.

2. Margin of error is calculated on the unweighted sample sizes, utilizing a 99% confidence interval.

3. There were additional quotas on ethnicity in the UK and U.S., and on nationality in Saudi Arabia and the UAE.

4. The “global average” indicates the average result of all the countries where data was collected. As mentioned above, there has been no adjustment made to the population size relative to each country and the global average is not intended to suggest a total result of the entire global population.

5. All data collected in China is from the mainland. Regions of Greater China were not surveyed.

2025 Edelman Trust Barometer: The Sample

Additional Fielding in Canada

Respondents in Canada have the option to take the survey in English or in French. For those who selected French, due to a translation error, a few questions were shown in English instead.

To address this, and ensure each respondent was able to answer the full survey in their preferred language, all Canadian respondents who took the survey in French were re-contacted between December 12 and 17, 2024 to answer French language versions of the impacted questions, as well as associated questions used for comparing or segmenting data. This new data replaced the original data collected in the dataset at those impacted questions.

French-selecting respondents who did not participate in the recontact were removed from the final data set. All data was then re-weighted to be nationally representative of gender, age, and region in Canada.

To summarize:

- All Canada data among English-selecting respondents is from the original fielding wave of Oct 25 – Nov 12.
- Canada data among French-selecting respondents at the impacted questions is from the recontact fielding wave of Dec 12 – 17.
- Canada data among French-selecting respondents at all other questions is from the original fielding wave of Oct 25 – Nov 12.
- Each Canada respondent who selected French and is present in the final dataset took both waves of the survey, so the sample is consistent across questions.

Any impacted data is indicated in the footnote of the slide.

1. Because some of the content we ask is deemed politically sensitive, there are several countries where we take special precautions in order to avoid putting our respondents, or ourselves, in a position to break any local laws. We work closely with our sample partner and its legal team to identify which questions, and in what countries, we should refrain from asking. The countries where we removed certain questions and/or answer options in the survey are noted in the labels on the slide.

2. Due to a translation inconsistency regarding the measure of competence or ethics in the four main institutions in France, Saudi Arabia, South Korea, and UAE, the data for those countries was removed from the relevant analyses.

Due to disproportionate access to internet in countries with lower internet penetration, the online sample in those countries tends to skew younger, urban, and more affluent.

2025 Edelman Trust Barometer: Data Analysis in Detail

Countries With National Elections or Changes in Government Leadership

To understand the impact that a change in government leadership has on trust, we identified the countries in our study that had an election or other government leadership change between the survey fielding dates for the 2024 Trust Barometer (Nov 3 – Nov 22, 2023) and the 2025 Trust Barometer (Oct 25 – Nov 16, 2024). Elections or other government leadership changes were defined as a national election, the collapse of coalition, or the appointment of a new prime minister.

The full list of countries included in the analysis, referenced on pg. 6 of the 2025 Global Report, is shown in the table at right

	Date of change	Description of change
Argentina	November 2023	Run-off Election
France	June, September 2024	Election; Collapse of leadership coalition
Germany	November 2024	Collapse of leadership coalition
India	April to June 2024	Election
Indonesia	February 2024	Election
Japan	October 2024	Election
Mexico	June 2024	Election
Netherlands	November 2023	Election after cabinet collapse in July 2023
S. Africa	May 2024	Election
S. Korea	April 2024	Election
Thailand	August 2024	New Prime Minister appointment
UK	July 2024	Election
U.S.	November 2024	Election

2025 Edelman Trust Barometer: Data Analysis in Detail

How We Measured Grievance

The sense of grievance segmentation was created by dividing respondents into three distinct groups based on their agreement with a number of statements. The specific statements were chosen for their ability to reflect a respondent’s sense of unfairness and personal harm caused by institutions, specifically business and government, and by the wealthy:

- **Government*** actions hurt me and serve the few rather than the many
- **Business** actions hurt me and serve the few rather than the many
- **The wealthy** benefit from an unfair system, which is biased in favor of the rich, while regular people struggle to pay their bills

The full language of the statements used in the scale are shown in the table shown to the right. The three segments—low, moderate, and high grievance— were created based on the number of statements they agreed with:

- **Low Grievance:** agreed with 0 to 2 statements
- **Moderate Grievance:** agreed with 3 or 4 statements
- **High Grievance:** agreed with 5 or all 6 statements

Items	Question text	
Government	GOV_PER_DIM. In thinking about why you do or do not trust government in general , please specify where you think it falls on the scale between the two opposing descriptions. (Please use the slider to indicate where you think government in general falls between the two extreme end points of each scale.) <i>Statement below shown in bold on left side, bottom 5 box (codes 1-5)</i>	
	Serves the interests of only certain groups of people	Serves the interests of everyone equally and fairly
	Overall, its actions are hurting my quality of life	Overall, its actions are improving my quality of life
Business	BUS_PER_DIM. In thinking about why you do or do not trust business , please specify where you think it falls on the scale between the two opposing descriptions. (Please use the slider to indicate where you think business falls between the two extreme end points of each scale.) <i>Statement below shown in bold on left side, bottom 5 box (codes 1-5)</i>	
	Serves the interests of only certain groups of people	Serves the interests of everyone equally and fairly
	Overall, its actions are hurting my quality of life	Overall, its actions are improving my quality of life
The wealthy	POP_MDC. Below is a list of statements. For each one, please rate how true you believe that statement is using a nine-point scale where one means it is “not at all true” and nine means it is “completely true”. (Please select one response for each.) <i>Agree, top 4 box (codes 6-9)</i>	
	As regular people struggle just to pay their bills, the elites are getting richer than they deserve	
	The system is biased against regular people and in favor of the rich and powerful	

*Questions related to government were not asked in China or Thailand. These markets are not represented in the grievance scale.

How We Plotted the Institutional Competence and Ethics Scores

We define trust as the combination of competence and ethics. The report features a chart depicting how competent and ethical each of the institutions are rated to be. Here’s how we calculated each score.

The competence score (the x-axis of the plot): An institution’s competence score is a net of the top 3 box (AGREE) minus the bottom 3 box (DISAGREE) responses to the question “To what extent do you agree with the following statement? *[INSTITUTION] in general is good at what it does*”. The resulting net score was then subtracted by 50, which means that for an institution to qualify as competent, it would require a net difference of 51 points or more in its percentage of top 3-box ratings versus its bottom 3-box ratings. This ensures that an institution could not be considered competent unless there is a majority who rate it as such.

The net ethical score (the y-axis of the plot): The ethics dimension is defined by four separate items. For each item, a net score was calculated by taking the top 5 box percentage representing a positive ethical perception minus the bottom 5 box percentage representing a negative ethical perception. The y-axis value is an average across those 4 net scores. Scores higher than zero indicate an institution that is perceived as ethical.

Respondents were asked:

In thinking about why you do or do not trust *[INSTITUTION]*, please specify where you think they fall on the scale between the two opposing descriptions. *(Please use the slider to indicate where you think [INSTITUTION] falls between the two extreme end points of each scale.)*

Dimension	Ethical Perception	Unethical Perception
Purpose-Driven	Highly effective agents of positive change	Completely ineffective agents of positive change
Honest	Honest and fair	Corrupt and biased
Vision	Have a vision for the future that I believe in	Do not have a vision for the future that I believe in
Fairness	Serve the interests of everyone equally and fairly	Serve the interests of only certain groups of people

2025 Edelman Trust Barometer: Data Analysis in Detail

How We Validated the Analysis of Ethics Scores Across the Grievance Segments

The ethics dimension for government and business share a variable with the scale used to create the grievance segments, raising the question of whether it was valid to compare institutional ethics scores across these segments (see pg. 25 of the 2025 Global Report).

To ensure the validity of measuring ethics data among different grievance segments, we compared the ethics scores for the institutions with and without the shared fairness attribute.

Dimension	Ethical	Unethical
Fairness	Serve the interests of everyone equally and fairly	Serve the interests of only certain groups of people

As seen in the analysis shown to the right, removing this attribute resulted in very similar ethics scores for each of the institutions, and did not materially change the findings of the analysis. Because of the similarity between the ethics calculations including and excluding the fairness item, we used the full version of the ethics scale for the competence and ethics analysis by grievance segments in order to maintain consistency with the ethics scores shown in other parts of the report.

Comparing ethics data including and excluding the fairness dimension				
Ethics scores	Low Grievance	Moderate Grievance	High Grievance	Gap between low and high
Government ethics excluding fairness	33	-24	-68	-101
Government ethics including fairness	37	-30	-75	-112
Media ethics excluding fairness	24	-4	-36	-60
Media ethics including fairness	25	-9	-41	-66
Business ethics excluding fairness	43	29	-18	-61
Business ethics including fairness	44	19	-36	-80
NGO ethics excluding fairness	35	23	6	-29
NGO ethics including fairness	34	17	-2	-36

2025 Edelman Trust Barometer: Data Analysis in Detail

How We Calculated Respondent Trust Levels

To examine the effect of trust on grievance and personal economic optimism (shown on pg. 36 of the 2025 Global Report), we segmented respondents into nine levels based on their average level of trust.

The average was calculated by taking the respondent’s average score on a scale of one to nine across each of the four institutions:

- Government in general
- Media in general
- Business in general
- Non-governmental organizations (NGOs)

If a respondent answered “don’t know” to one of the four institutions, that institution was left out of the average. For example, if a respondent said “don’t know” regarding trust in government, the average was calculated based on their ratings of media, business, and NGOs. If a respondent said “don’t know” across all four institutions, they were left out of this analysis.

The table to the right shows the fallout of respondents based on their average score across the institutions.

Trust scores and fallout			
TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right using a 9-point scale where one means that you “do not trust them at all” and nine means that you “trust them a great deal”.			
Trust level	Fallout	Unweighted base	Weighted base
1. Do not trust them at all	1%	360	350
2.	3%	1022	1003
3.	7%	2150	2097
4.	12%	3641	3537
5.	19%	5978	5774
6.	22%	6698	6499
7.	20%	6159	5990
8.	11%	3558	3376
9. Trust them a great deal	4%	1300	1249
99. Don't know	n/a	n/a	n/a
